Ladies and gentlemen,

Welcome to the Charles Walters Council for Innovation & Research. Today, we gather not only to celebrate our remarkable journey but to unveil an inspiring vision for the future, rooted in scientific excellence, innovation, and corporate social responsibility.

Our organization, named in honor of the distinguished English zoologist and botanist, Late Charles Walters de Vis, has a heritage steeped in scientific discovery. I stand before you with deep gratitude as we gather for this auspicious event.

Since our inception under the Ministry of Corporate Affairs in 2020, our mission has been to provide a platform where brilliant minds converge, where creativity flows, and where individuals are empowered to redefine the standards in their respective fields. The past three years have been a testament to our commitment.

In this short span, we've supported around 300 young researchers financially, laying the foundation for their academic brilliance. We've successfully placed numerous talents in scientific labs, pharmaceutical industries, tinkering programs, software companies, and more.

Our "Kalaam ki Kalam" campaign, designed to ignite scientific curiosity among the younger generation, has spanned far and wide, nurturing a culture of scientific inquiry in our children.

Our impact on Sustainable Development Goals (SDGs) has been substantial, with over 100 live shows showcasing actionable models. We've taken our message global, hosting over 200 conferences in India, Thailand, Malaysia, and the UAE, promoting innovative teaching and learning methods.

Furthermore, we've trained over a hundred schools and thousands of teaching professionals to make science and math education engaging and interactive.

One of our proudest achievements has been our proposal for a world education policy, aiming to foster one world and one education, eliminating the disparities in educational systems across nations.

In collaboration with the Niti Ayog, we are bridging the skills gap in the field of science and technology. Our contributions extend to providing essential resources like robotic labs, tinkering labs, and advanced science facilities to educational institutions.

Our dedication has earned accolades from various ministries, national and international universities, and organizations.

But our journey doesn't stop here. In the realm of science and technology, we're embarking on groundbreaking initiatives:

We're pioneering research in quantum computing, set to revolutionize computation, cryptography, and data analysis.

Our journey takes us into neuroscience and brain-computer interfaces, aiming to enhance human potential and improve quality of life

Bhartiy Space Exploration and Colonization in which We envision contributing to India's space exploration efforts and laying the groundwork for celestial colonization.

We're investing in nanotechnology to develop groundbreaking applications in transportation, healthcare, and materials science.

Our plans include creating smart, environmentally sustainable materials for housing and infrastructure, integrating hydraulic systems for efficiency.

We're harnessing AI's power to create advanced human-computer interactions and personalized experiences.

In the arena of Corporate Social Responsibility, we are setting the stage for transformative change:

Zero Hunger Mission counts our Food Bank initiative expands to alleviate hunger, not only within India but also in regions facing similar challenges globally.

We're providing education, skills, and resources to uplift underprivileged communities, enabling them to break the cycle of poverty.

Prioritizing health through initiatives like blood donation drives and awareness campaigns, ensuring that every individual has access to quality healthcare.

Our clothing donation programs extend to provide warmth and dignity to those in need, especially during harsh seasons.

We're committed to reducing our carbon footprint and promoting eco-friendly practices across all our operations.

But that's not all. Our commitment to a brighter future extends to our futuristic plans:

We shall be launching a virtual education platform offering competitive exam preparation alongside regular academic classes from Kindergarten to Postgraduate levels.

We're insisting for the implementation of a world education policy, advocating for one world, one education, to bridge the disparities among educational patterns worldwide.

Orphanages by 2030 visualises that We're dedicated to building orphanages equipped with educational, shelter, and nutritional support, ensuring a brighter future for the underprivileged.

We're strengthening the scientific temper of India's youth through our "Kalaam ki Kalam" program.

We're conducting state-wise awareness camps focusing on self-defense, cleanliness, pollution control, blood donation, and addressing the challenges of adolescence.

We're expanding our global footprint with over 20 conferences planned for 2023.

Our commitment to youth empowerment includes free placement solutions to bridge the gap between skills and job market expectations.

We shall be evolving into a comprehensive consultancy offering educational, financial, and legal solutions under one roof.

We're targeting over 10,000 youths in 2023 through the "Yuva Desh ki Hava" campaign, fostering national pride and scientific temperament.

By 2025, we aim to develop the "Prithvi Kutumb" open blogging system, connecting the world's brightest minds to promote peace, harmony, and a global family of cooperation.

Today, we stand at the intersection of our past achievements and our promising future. Our futurist plans are a testament to our unwavering dedication to shaping a brighter future for our nation and the world.

Together, we aim to transcend boundaries, break new ground in science and technology, and make a lasting impact on society.

We are honored to have you here, as your support and collaboration are the driving forces behind our success. So, let us begin this event with a shared sense of purpose, excitement, and determination, as we chart a course towards a future filled with innovation, progress, and positive change.

Thank you for being part of this extraordinary journey with Charles Walters Council for Innovation & Research. Together, we will shape the future we envision

With warm regards
Abhishek Pandey
